Paruchuru Purandhar

Data Science and Machine Learning Enthusiast

Andhra Pradesh, India | +91 7032694836 | purandhar0408@gmail.com
LinkedIn | GitHub | Portfolio

Professional Summary

Aspiring Data Scientist skilled in Python, SQL, Machine Learning, Data Analysis, and Data Visualization. Experienced in developing ML projects including Credit Card Fraud Detection and Flight Fare Prediction.

Technical Skills

- Programming Languages: Python, SQL
- Libraries & Tools: Pandas, NumPy, Scikit-Learn, TensorFlow, Power BI, Tableau, Git
- Machine Learning: Regression, Classification, Clustering, Feature Engineering, Data Preprocessing

Experience

Rubix — Data Scientist Intern Sep 2025 – Mar 2026

- Developed machine learning models for customer transaction prediction and flight fare estimation using Python,Scikit-learn.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) on large datasets.
- Built regression-based models for airline ticket price prediction and improved accuracy through hyperparameter tuning.
- Utilized Pandas, NumPy, Matplotlib, and Scikit-learn for data analysis and model development.

CODETECH IT SOLUTIONS — Machine Learning Intern Jan 2025 – Feb 2025

- Developed fraud detection models using classification algorithms,ensemble learning techniques.
- Improved model performance using SMOTE for handling imbalanced datasets.
- Conducted data cleaning, preprocessing, and model evaluation using ROC-AUC,confusion matrix metrics.
- Worked with Python, Pandas, NumPy, and Scikit-learn for predictive analytics tasks.

Projects

Credit Card Fraud Detection System GitHub | Live Demo

- Developed a machine learning model to detect false credit card transactions using classification algorithms.
- Performed data preprocessing, feature scaling, and handled imbalanced datasets using SMOTE.
- Achieved high prediction accuracy using Random Forest and Logistic Regression models.
- Technologies Used: Python, Pandas, NumPy, Scikit-learn, Streamlit.

Flight Fare Prediction System GitHub | Live Demo

- Built a regression-based machine learning model to predict airline ticket prices.
- Conducted exploratory data analysis (EDA) and feature engineering on flight datasets.
- Implemented model training and evaluation using Scikit-learn regression algorithms.
- Technologies Used: Python, Pandas, NumPy, Matplotlib, Scikit-learn.

Education

B.Tech in Computer Science Engineering 2021 – 2025
J.N.N Institute of Engineering CGPA: 7.86

Intermediate (MPC) 2019 – 2021
Narayana Junior College Marks: 932/1000

SSC 2018 – 2019
Lumbini Vidyalayam CGPA: 9.8

Certifications

- Kaggle Competition Participant – Global Rank 3,057
- IABSE-Data Scientist Certificate
- NASSCOM Certified Data Scientist
- HackerRank Python Certificate
- Udemy Python Certificate
- DataMites-Certified Data Scientist Certificate

Soft Skills

- Problem Solving
- Analytical Thinking
- Communication
- Teamwork
- Time Management
